## WHY ATTEND OUR MEETING? >

During this 6th Multidisciplinary Meeting on Prostate Cancer, **organised from now on by the Clinical Urology team at the IMQ Zorrotzaurre Clinic and the Urology Group at the San Rafael Hospital in Madrid**, we will be discussing issues related to the diagnosis and treatment of prostate cancer.

In addition to current diagnostic controversies, the **6th MEETING ON PROSTATE CANCER** will also focus on the treatment of Prostate Cancer, Active Surveillance, Focal Therapy, Surgery and Radiotherapy. It will also analyse the very latest developments in Biomarkers, Imaging and the treatment of Prostate Cancer.

We will again be meeting over the course of two days, in a conference format that will feature live surgery and will enable us all update our knowledge in all the aforementioned fields, and draw conclusions that will help us provide a better service to our patients.

**And as if that in itself were not enough, Bilbao is a city well worth visiting.**
